

The University of Florida
**Geotechnical
Instrumentation
for Field Measurements**

March 15-17, 2009

Doubletree Hotel • Cocoa Beach, Florida

Course Director: John Dunicliff
Lectures by Users of Instrumentation
Lectures and Displays
by Manufacturers of Instrumentation

WHO: Engineers, geologists, and technicians who are involved with performance monitoring of geotechnical features of civil engineering projects.

WHY: To learn the who, why, and how of successful geotechnical monitoring. To meet and discuss with others in the geotechnical instrumentation community.

WHAT: Practical information by leaders of the geotechnical instrumentation community, representing both users and manufacturers:

- John Dunicliff, Consulting Engineer
- Martin Beth, Sol Data
- Marcelo Chaqui, Monir Precision Monitoring
- Roger Chandler, Keynetix
- Aaron Grosser, Barr Engineering
- Colin Hope, Monir Precision Monitoring
- Daniele Inaudi, RocTest/Smartec
- Allen Marr, Geocomp
- Kevin O'Conner, GeoTDR
- David Rutledge, Leica Geosystems
- Tony Simmonds, Geokon
- Robert Taylor, RST Instruments
- Randy Welch, U.S. Bureau of Reclamation

Ample time for questions and discussion.
Displays of geotechnical instruments.
